

SPRING BUMPERS

Our offer includes a variety of gate springs and garage door stops, which significantly improve the smoothness and safety of using gate systems. These springs, available in various models, including those with a flat mounting plate and those attached to a C-profile, allow for precise adjustment to specific installation needs. Thanks to this, using gates becomes not only more comfortable, but also safer, which is crucial in their everyday use. Each gate spring is carefully designed to meet the highest standards of quality and durability. Components for gates sp. z o.o. also offers universal garage door stops of various lengths, which can be easily combined with other elements, such as supports or mounting plates. Additionally, we have special mounting brackets dedicated to springs, which significantly facilitates their installation and ensures reliable operation. We believe that our offer, characterized by high quality and versatility, is an excellent solution for all types of gate systems. We invite you to familiarize yourself with the full range of our products, which are appreciated by professionals.
