
BRD60130 DRIVE 230V/400V 50HZ SPEED 60NM 130RPM LIMITER WITH 3 CAMS
ARTICLE: 1

Factory price: 599.00 € (excl. VAT) / piece Price without VAT

PRODUCT DESCRIPTION

• Rapido is a three-phase motor, ideal for the high-speed door market. • The installer can independently change the gear motor power supply connection from star (400 V) to delta (230 V) and vice versa.

All models are equipped with an electromagnetic brake that suddenly stops the motor inertia, and an integrated safety brake.

Mechanical limit switch: 2 green cams for operating limits, 2 red cams for safety limits, 2 yellow cams for auxiliary control.

OVERLOAD SAFETY FACTOR

The motor overload safety factor = 4 x the motor rated current, since the Rapido starting current can reach these levels for a short time.

MANUAL OPERATION

Rapido is supplied with a crank for manual operation in the event of a power failure

EUROPEAN DIRECTIVES

The motor is manufactured in accordance with the product standards EN 13241-1 Doors- and EN 12453 Safety for electrically operated doors.
